## ACADEMIC DETAILS

Examination	University	Branch	Year	Score
B.Tech	TECHNOCRATS INSTITUTE OF TECHNOLOGY (EXCELLENCE)	Computer Science and Engineering (CSE)	2027	7.7 CGPA

## PROJECTS

- **Weather App – Real-Time Weather Forecast Web App** [github](#)  
(07/2025 , 07/2025)
  - The Weather App is a responsive and user-friendly web application that provides real-time weather updates for any city or location across the globe. It fetches accurate and up-to-date weather data using an external API (like OpenWeatherMap API) and displays it in an intuitive and visually appealing format.
- **TaskMaster** [github](#)  
(05/2025 , 05/2025)
  - TaskMaster is a simple and efficient web-based task management application designed to help users organize, track, and manage their daily tasks and to-dos. The app focuses on productivity by allowing users to create, update, and delete tasks with a clean and intuitive interface.

## TECHNICAL SKILLS

- **Languages :** JAVA , C++, HTML, CSS ,JavaScript
- **Frameworks :** React.js ,Bootstrap
- **Databases :** MYSQL
- **Tools :** VSCODE

## CERTIFICATIONS

- **Artificial Intelligence , Communication Skills** (4JAN 2025 ,)
- **Communication Skills** ( 4 JAN 2025)

## Achievements

- \* Built a fully functional task management web app from scratch using HTML, CSS, and JavaScript, demonstrating strong frontend development skills.
- \* Improved productivity for users by implementing a clear task workflow (create, update, complete, delete).
- \* Integrated responsive design, making the app mobile-friendly and accessible across all screen sizes.
- \* Applied clean code practices, modular functions, and reusable components for maintainability and scalability.
- \* Connected frontend with backend using Node.js and MongoDB (if applicable), enabling task persistence and user data management.
- \* Implemented advanced features such as filtering, priority levels, and localStorage/database integration.
